Summer 2024

1. Introduction

Welcome to the AudioWave User Help Guide. This guide will provide step-by-step instructions on how to use the platform's features, from registering an account to uploading audio and managing playlists.

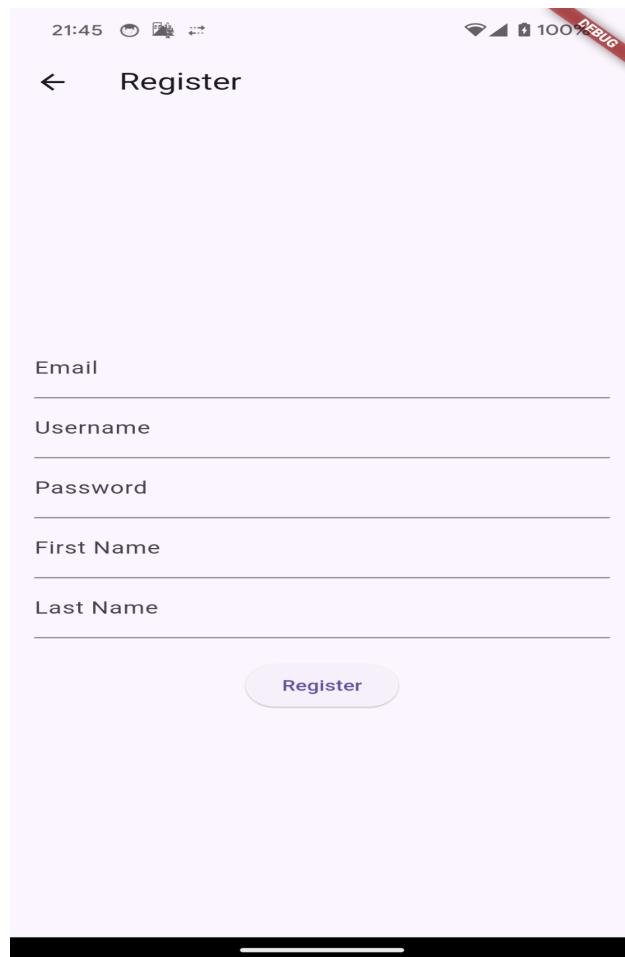

2. User Registration and Login

Steps:

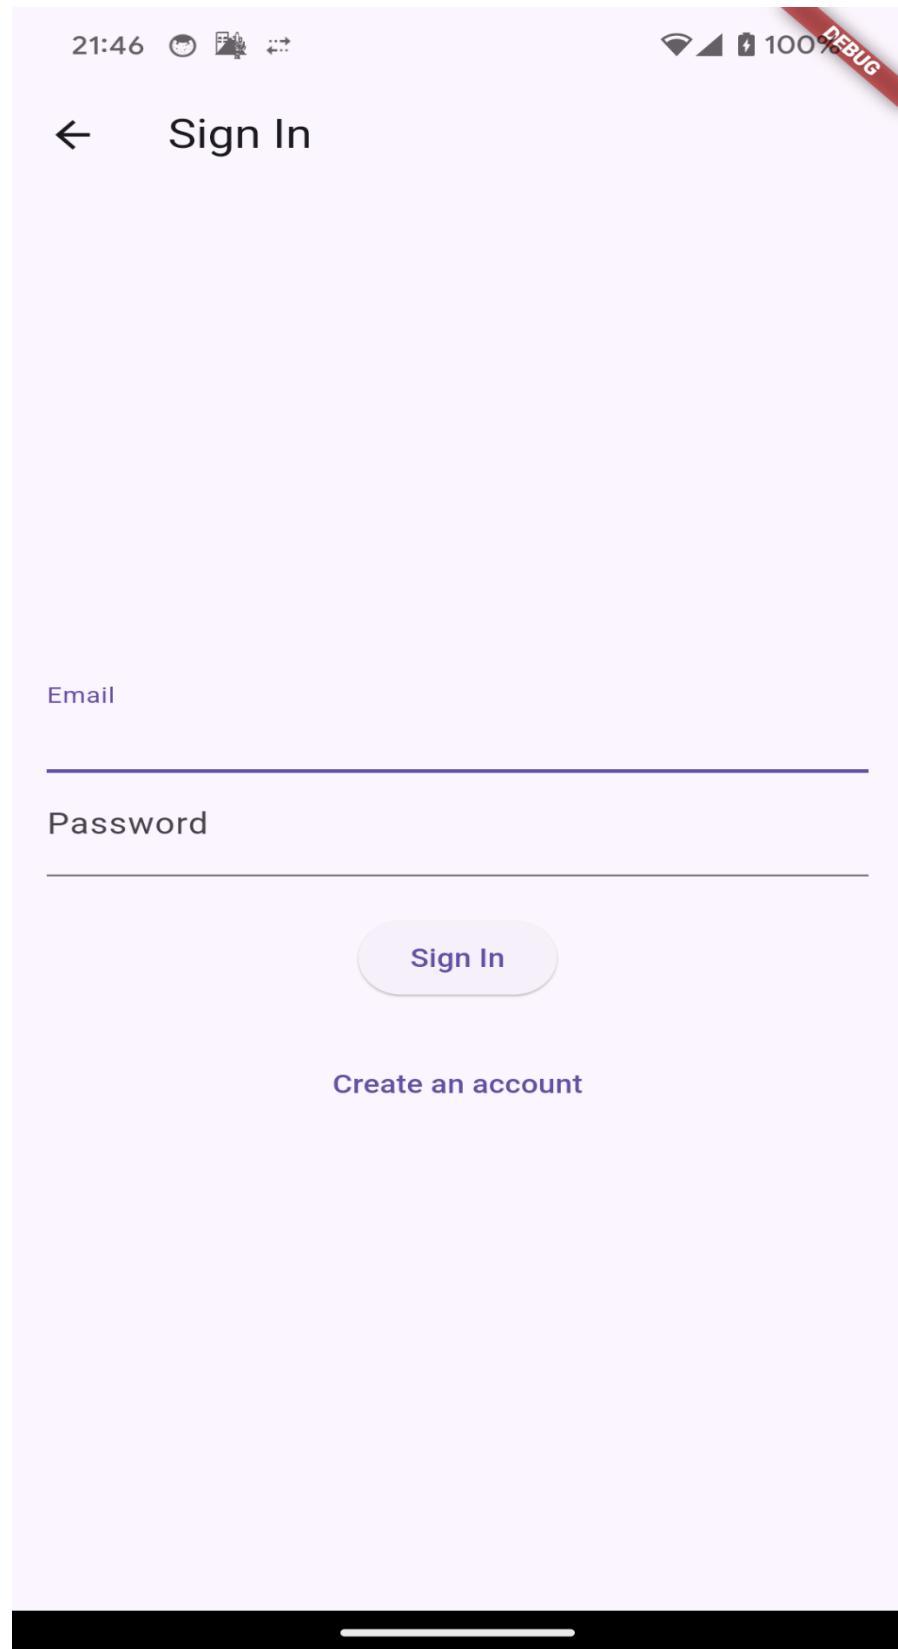

- Open the AudioWave application.

- Enter your email, username, and password.

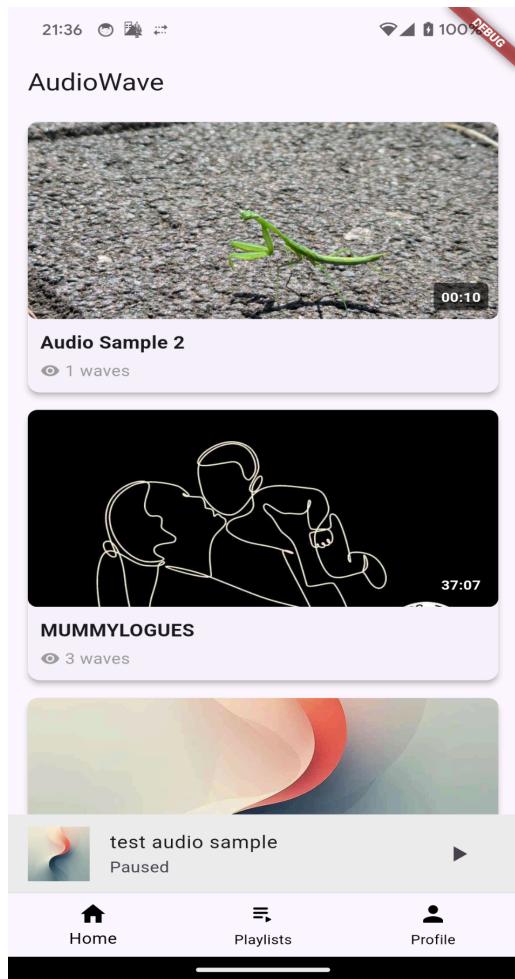

- Click **Register**.
- enter your email and password, click at sign in to start using the platform.

3. Home Page

Welcome to the home page, feel free to paging!

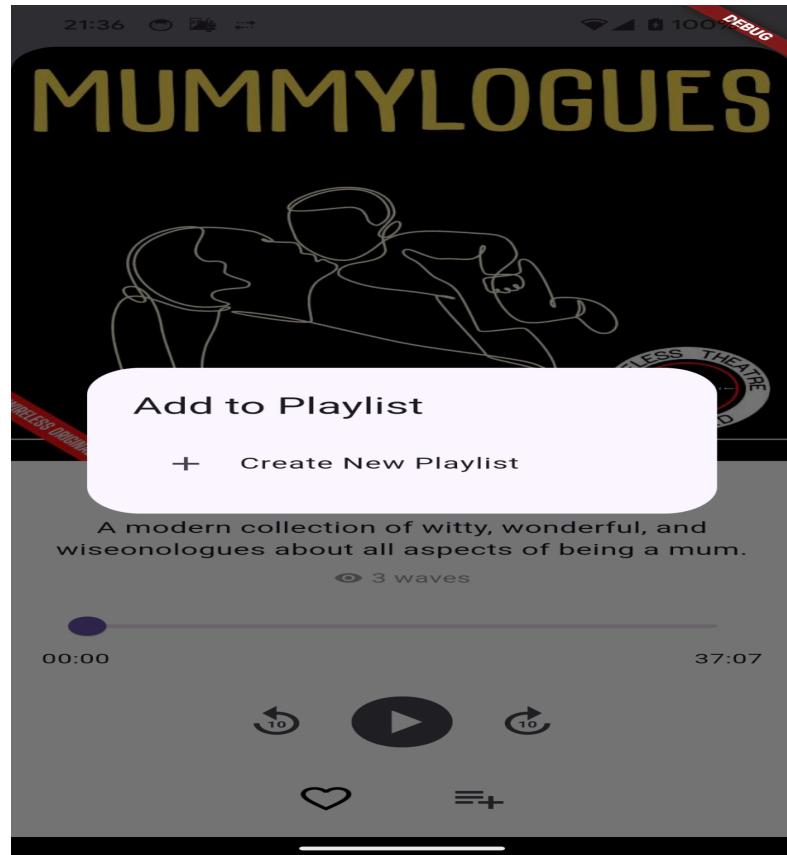

4. playing Audio File

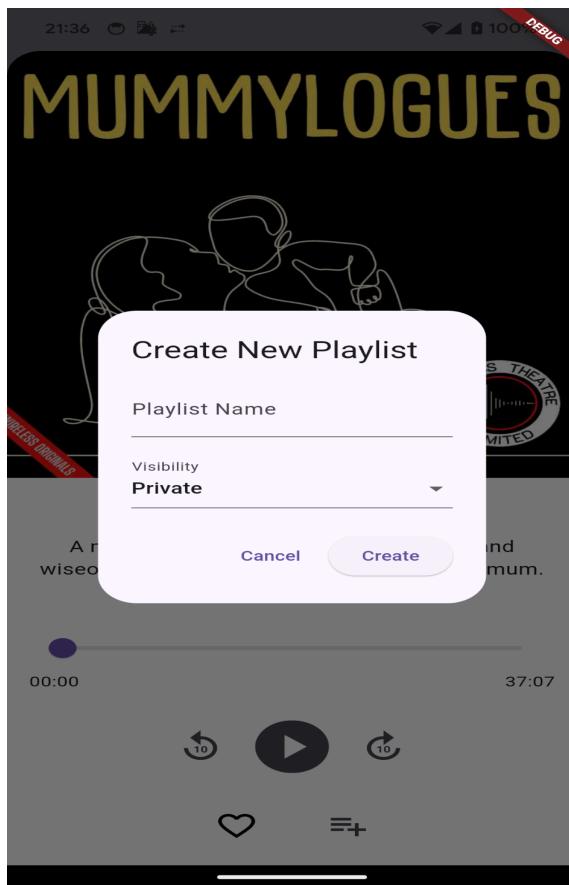

- after choosing the file to listen, the top part of audio file screen shows the “title” (*MUMMYLOGUES*) of the audio file
- along with the description “ “A modern collection of witty, wonderful, and wise monologues about all aspects of being a mum.”
- Below the title, there is a purple progress bar that shows the current time elapsed and total duration of the audio file. In this case, the audio is 37:07 minutes long, and the user is at the beginning (00:00).
- **Playback Controls:**
 - **Rewind 10 seconds:** The circular arrow button with "-10" allows the user to skip backward by 10 seconds.
 - **Play/Pause Button:** The large central button lets the user play or pause the audio.
 - **Fast Forward 10 seconds:** The circular arrow button with "+10" lets the user skip forward by 10 seconds.
- **Additional Actions:**
 - **Heart Icon:** Users can click this icon to add the audio to their list of liked audios.
 - **Playlist Icon:** Clicking this button allows users to add the audio to a playlist.
- **View Count (Waves):**
 - The number of listens or "waves" is displayed just under the description, showing that this audio has been played 3 times.

5. playlist performance

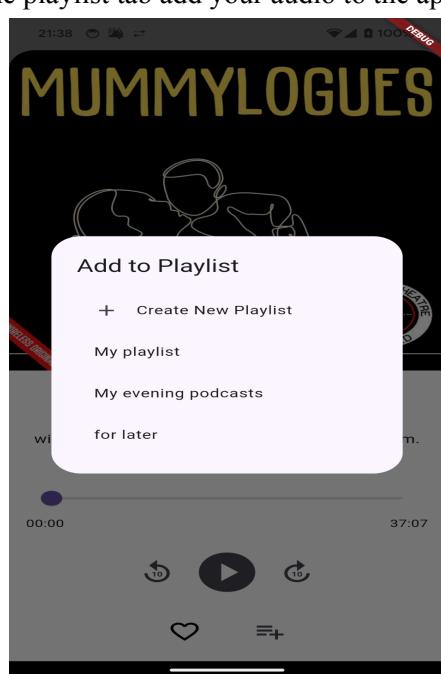

- you can add the audio to your playlists by tabbing at the playlist icon down there its will guide you to build a new playlist if you didn't before

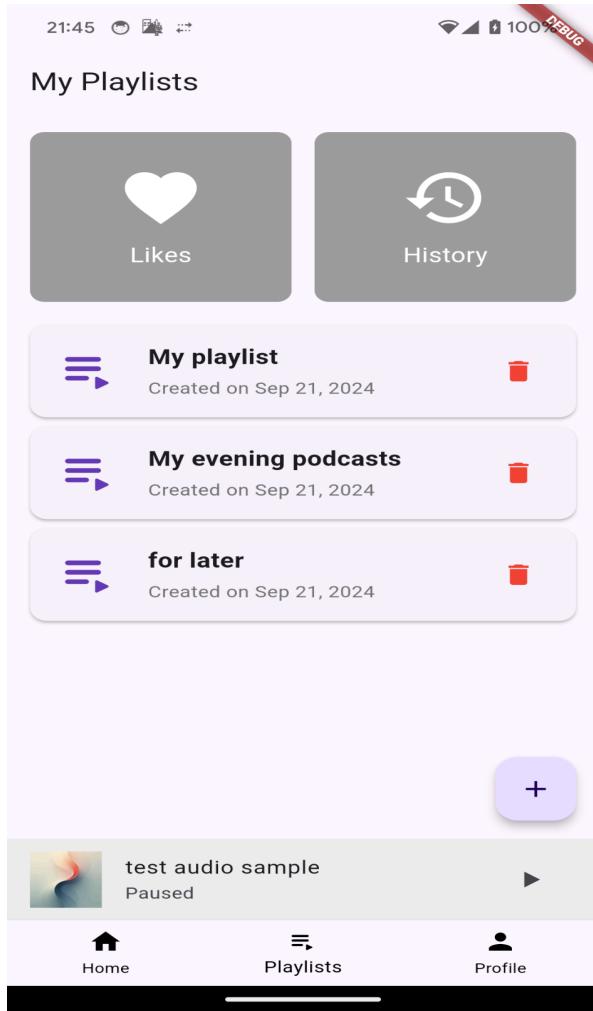

- click “create New Playlist”

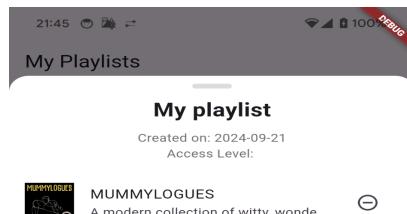

- choose Name and visibility
- after creating the playlist tab add your audio to the appropriate list

- playlists:

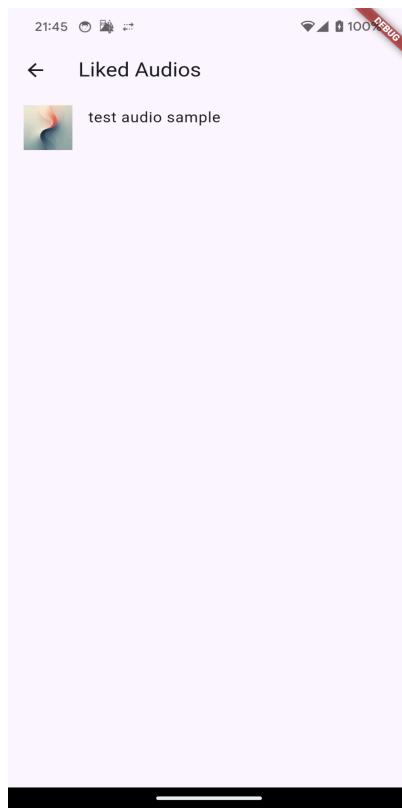

- you can also create a new playlist from the “+” icon down there.
- open playlist package to check out the audio files.

6. Likes and History in Playlists

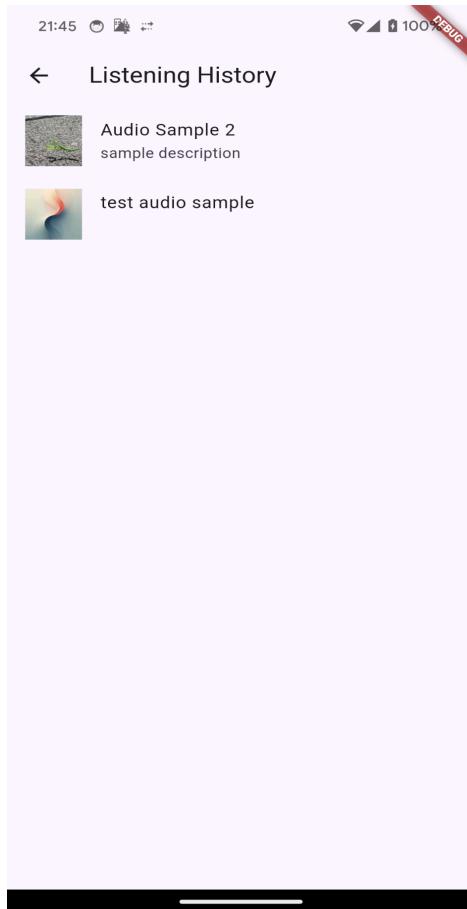

- This screen up there also shows the My Playlists section, where users can manage their playlists. Two important features available at the top are the Likes and History options:
- Likes:
 - The Likes section allows users to access audio files they have marked as favorites.
 - When a user listens to an audio file and clicks the heart icon, the file is automatically saved in their Likes list.
 - Clicking on the Likes icon from this screen will display all the audio content the user has liked, making it easy to revisit and listen to favorite tracks.

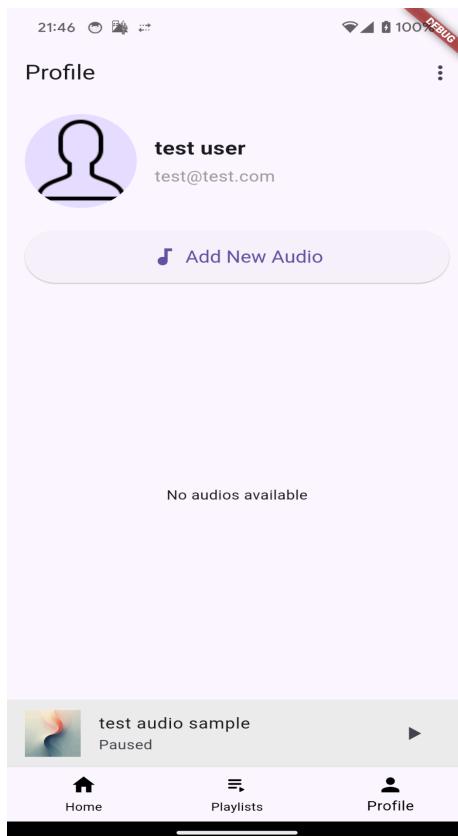

- This screen shows the Liked Audios section, where users can see all the audio files they have marked as favorites by clicking the heart icon during playback.
- Key Elements:
 - Audio List: This screen displays all the audios you have liked. In this case, the user has liked the audio titled "test audio sample".
 - Navigation: The back arrow at the top left allows users to return to the previous screen (Playlists section).
 - Users can access this screen by clicking on the Likes option in the My Playlists section. This is a convenient way to revisit audio files that have been marked as favorites.

History:

- The History section shows the list of recently played audio files.
- This feature helps users track and access previously listened-to content.
- When users click on the History icon, they will see a chronological list of audio files they have played, allowing them to quickly return to any previous audio without needing to search for it again.

7. Profile Section

- **User Information:**

- Displays the user's profile picture (if uploaded), username (e.g., "test user"), and email address (e.g., "test@test.com").

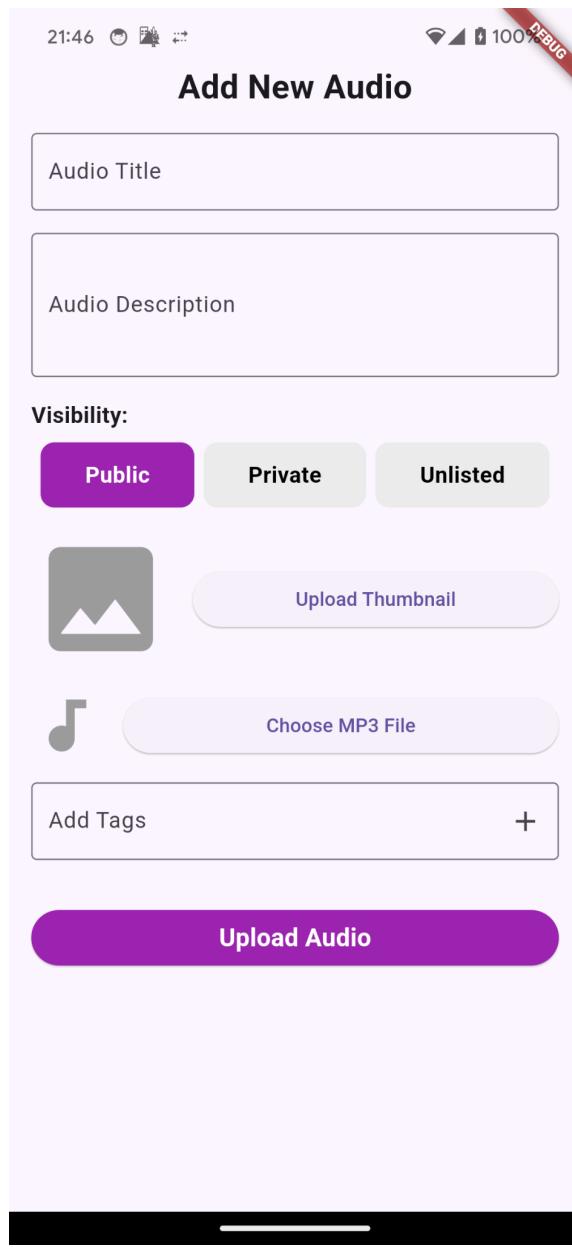

- **Add New Audio:**

- The Add New Audio button is prominently displayed below the user information.
- Clicking this button allows users to upload new audio files directly from their profile page.

8. Adding New Audio:

after clicking at the add new audio you will move to :-

Audio Title:

- A field where users can input the title of their audio file.
- This title will be displayed to other users when browsing or searching for audio content.

Audio Description:

- A field for adding a description of the audio file.
- This can include relevant details about the content, such as the topic, duration, or key highlights.

Visibility Settings:

- Users can choose between three visibility options:
 - **Public:** The audio is accessible to all users.
 - **Private:** The audio is only accessible by the user who uploaded it.
 - **Unlisted:** The audio is not publicly listed but can be accessed via a direct link.

Upload Thumbnail:

- Users can upload a custom thumbnail image for their audio file by clicking the Upload Thumbnail button.
- This image will represent the audio file and will be displayed alongside the title and description.

Choose MP3 File:

- This option allows users to upload the actual audio file (in MP3 format) by clicking Choose MP3 File.

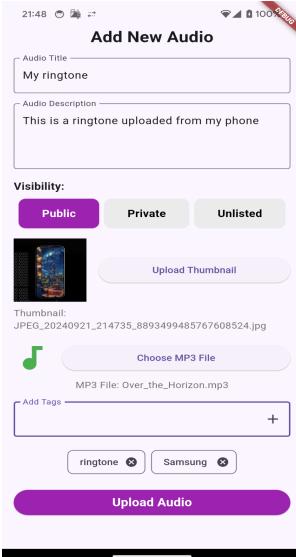

Add Tags:

- Users can add tags that help categorize and improve the discoverability of the audio file.
- Tags can include genres, topics, or any relevant keywords.

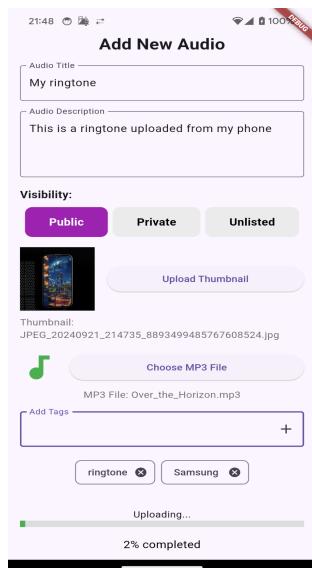

9. Upload Audio:

- Once all fields are filled out and the audio file is selected, clicking the Upload Audio button will start the upload process.
- The system will chunk the audio file for efficient streaming example:

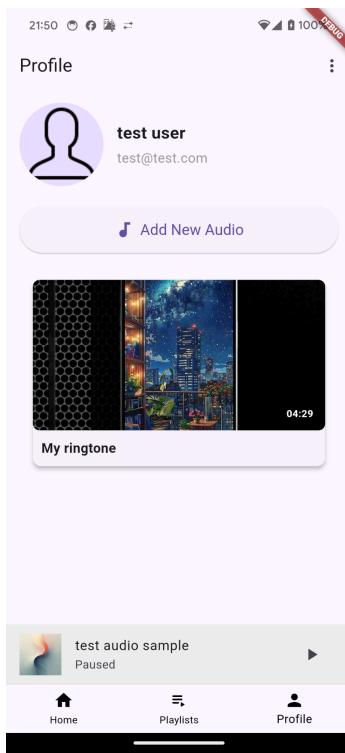

after filling details

start upload process

after upload, the file will appears at the profile page
this photo shows playing screen down there for this file

10. Audio Playback Screen

- This screen shows the playback interface for an audio file titled My Ringtone, which has been uploaded to the platform. Users can listen to and control audio playback from this screen.
